The Smart Transportation Analytics Research (STAR) lab at San Diego State University is currently seeking full-time/part-time research assistants to join our research team. This paid position is focusing on transportation data analytics. The successful applicants will have the opportunity to work on a funded project on traffic safety monitoring and assessment at signalized intersections using machine vision techniques.

Experience with some or all of the following is desired:

- R Programming
- Machine learning
- Machine vision algorithms for object detection/tracking
- Big data analytics
- Web development & Design

To apply or obtain additional information, please email your CV to Dr. Arash Jahangiri at Ajahangiri@sdsu.edu. Please state “RA Safety Monitoring” in the email subject.
